Work Experience

Dec 2023 – Current

Team Member (Part-time → Full-time) KFC – Auckland, New Zealand

I initially worked part-time while pursuing a Postgraduate Diploma in IT, transitioning to full-time in October 2024.

- Prepared and cook chicken per KFC food safety and quality standards.
- Operated and maintained cooking equipment.
- Managed inventory by tracking and organising ingredients.
- Collaborated with team members for efficient service.

Nov 2020 – Feb 2022

Administrative Aide

Provincial Government of Bukidnon – Malaybalay, Philippines

I entered public service as an Administrative Aide, where I was tasked to develop digital solutions by leveraging my technical skills. During my tenure, I successfully digitalised office operations.

- Developed FITS App, a web application to digitalise the inventory system for agricultural infographics, guides, and magazines (React, Node.js, MySQL).
- Developed PAGRO-Admin, a web application to track inbound and outbound office documents (Next.js, MongoDB).

In addition to development, I was responsible for the following tasks:

- Managed and updated farmer SQL databases using SQL queries to ensure integrity and accuracy.
- Created detailed reports on farmer demographics and status using MS Excel to support decision-making.
- Provided computer troubleshooting and technical support for daily office operations.
- Procured and maintained office computers and other devices.
- Set up conference rooms, technology, and materials to facilitate meetings.

Dec 2019 – May 2020

Frontend Developer

CresCode – Remote

As a frontend developer, I joined an ongoing project for a telecommunications company based in Rome, Italy, where I focused on developing and enhancing an admin-side application using React and later migrated to Next.js.

- Developed Customer Account Management features to manage customer information, subscriptions, plans, usage monitoring, and support ticketing.
- Developed a Service Management feature to allow for the scheduled promotional bundles, family plans, or data packages.

On top of development, I worked closely with clients and team members.

- Worked with team members to develop user stories and plan sprints.
- Discussed site and app requirements with clients to ensure clarity and manage expectations.

Education

Oct 2023 – Sep 2024

Postgraduate Diploma in Information Technology

Te Pūkenga Eastern Institute of Technology – Auckland, New Zealand

Mar 2015 – Apr 2019

Bachelor of Science in Information Technology

Bukidnon State University – Malaybalay, Philippines
